Document Identifier: **PMC8364980**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
These patients were eligible for inclusion in the analysis if they met the eligibility criteria for mAb treatment (Table 1).
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: The target population for this evaluation was patients with positive results of SARS-CoV-2 viral testing who were ≥12 years of age, ≥40 kg in weight, and at high risk for progressing to severe COVID-19 or hospitalization.
Weight: The target population for this evaluation was patients with positive results of SARS-CoV-2 viral testing who were ≥12 years of age, ≥40 kg in weight, and at high risk for progressing to severe COVID-19 or hospitalization.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Race categories were defined as American Indian/Alaskan Native, Asian, Black, Hawaiian/Pacific Islander, White, and other.	Islander		Suggestion: Islander (RRID:SCR_007758)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Characteristics of patients were compared using Welch t tests for continuous variables and the chi-square test for categorical variables.	Welch t tests
	chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
