SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Methods Data Source All data were extracted from the Medical Information Mart for Intensive Care-IV (MIMIC-IV version 1.0) database, which is an updated version of MIMIC-III with pre-existing institutional review board approval, is freely available.
Inclusion and Exclusion Criteria
22 Patients with one of the following conditions were excluded: 1) less than 16-year-old at first admission to ICU 2) less than 24 hours of hospital stay 3) more than 10 of personal data was missing 4) patients with repeated ICU admissions and 5) patients with systemic inflammatory disorders and recent received glucocorticosteroid therapies.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: 22 Patients with one of the following conditions were excluded: 1) less than 16-year-old at first admission to ICU 2) less than 24 hours of hospital stay 3) more than 10 of personal data was missing 4) patients with repeated ICU admissions and 5) patients with systemic inflammatory disorders and recent received glucocorticosteroid therapies.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Chi-square test or Fishers test was appropiately performed to compare the differences between groups.	Chi-square test
	Fishers test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
