SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IACUC: MATERIALS AND METHODS Animals, experimental design, and diets The experimental protocol of the current study was approved by the Institutional Animal Care and Use Committee at Chung-Ang University (IACUC approval no. 2019-00086).
Euthanasia Agents: The remaining 2 birds were euthanized by CO2 asphyxiation .
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
A total of 1,368 mixed-sex Ross 308 broiler chickens (1:1 ratio of males and females) of 21 days of age with similar body weights (BW) were randomly allotted to 1 of 4 treatments with 6 replicates each.
Subject Demographics
Age: A total of 1,368 mixed-sex Ross 308 broiler chickens (1:1 ratio of males and females) of 21 days of age with similar body weights (BW) were randomly allotted to 1 of 4 treatments with 6 replicates each.
Randomization
The study was performed using a completely randomized design with a 2 x 2 factorial arrangement consisting of 2 different SD and 2 supplemental levels of dietary vitamin C.
Blinding
not detected.
Power Analysis
not detected.
Replication

A total of 1,368 mixed-sex Ross 308 broiler chickens (1:1 ratio of males and females) of 21 days of age with similar body weights (BW) were randomly allotted to 1 of 4 treatments with 6 replicates each.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis All data were analyzed by 2-way ANOVA as a completely randomized design using the PROC MIXED procedure (SAS Institute, Cary, NC, USA).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis All data were analyzed by 2-way ANOVA as a completely randomized design using the PROC MIXED procedure (SAS Institute, Cary, NC, USA).	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
