SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical approval for the study was obtained from the George Mason University Institutional Review Board.
Consent: Both participants and raters completed an informed consent and were compensated for their time.
Inclusion and Exclusion Criteria
not detected.
Attrition
One participant had only one BVS observation and was eliminated from this portion of the analysis.
Sex as a biological variable
not detected.
Subject Demographics
Age: Raters clinical nursing experience ranged from 1 to 43 years (mean = 17 yrs.,
Randomization
For each bruise participant, three nurses were randomly selected from the pool of 8 raters to perform an independent bruise assessment.
Blinding
During data collection, the nurses were blinded to each others ratings and the spectrophotometer readings.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed using SPSS version 25 (IBM Corp, Armonk, NY).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Shrout and Fleiss (1979) ICC 2 equation was used which includes two-way random effects model analysis of variance for absolute agreement.	analysis of variance

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
