SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethics approval The study was approved by the local ethics committee of the University of Gothenburg, Goteborg, Sweden (reference number 029-17 approved February 22, 2017).
Inclusion and Exclusion Criteria
Excluded from the incidence analysis were patients diagnosed before 1987, patients with PA not living in Vastra Gotaland County, and patients diagnosed before they moved to the county.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were performed using SPSS version 25.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
For comparison between 2 groups, unpaired t test was used for normally distributed data and Mann-Whitney U test for nonnormally distributed data.	t test
	Mann-Whitney U test
For proportions, Pearson kh 2 or Fishers exact test was used.	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
