SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was performed in accordance with the Helsinki Declaration, and the Ethics Committee of our hospital approved the study.
Consent: Each subject provided written informed consent after understanding the study details.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
In addition, the power analysis showed that the effect size for GRP78 concentrations was 0.686 (95% CI 0.558–0.813) and for CHOP concentrations was 0.670 (95% CI 0.524–0.816).
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2.7 Statistical analysis Statistical analyses were conducted by means of SPSS v22.0 (SPSS Inc . , Chicago , IL , USA) and Graphpad Prism 8 (GraphPad Software Inc .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	Graphpad		Suggestion: GraphPad (RRID:SCR_000306)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
To test data distribution, Kolmogorov–Smirnov test was used.	Kolmogorov–Smirnov test
Comparisons among categorical variables were conducted using the Chi-square test.	Chi-square test
Differences in continuous variables between 2 groups were done using Kruskal–Wallis H test or one-way analysis of variance.	Kruskal–Wallis H test
	analysis of variance
For multiple comparisons among groups, Bonferroni correction was used after one-way analysis of variance or Kruskal–Wallis H test.	Bonferroni

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
