SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IACUC: The animal study in this work was approved by the Institutional Animal Care and Use Committee of Capital Medical University, and the ethics number is AEEI-2018-174.
Field Sample Permit: Humane care of animals was given in the animal studies followed the protocol and the Regulations on Laboratory Animal Welfare issued by Chinese Ministry of Science and Technology.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
In vivo Activity Female BLABC Nude mice and male ICR mice were purchased from Beijing Vital River Laboratory Animal Technology Co .
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
S180 bearing mice were randomly assigned to seven treatment groups, including normal saline (NS), DOX, YW3-56 (356), AuNPs-c(RGDfK), AuNRs-c(RGDfK), 356-AuNPs-c(RGDfK) and 356-AuNRs-c(RGDfK).
Blinding
not detected.
Power Analysis
not detected.
Replication

Number: All values were obtained from at least three independent experiments.	
Cell Line Authentication	
not detected.	
Data Information	
Identifiers: Synthesis of 356-AuNPs-c(RGDfK) and 356-AuNRs-c(RGDfK) According to the literature,38,39,45 compound YW3-56 was synthesized and purified.	literature,38,39,45

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Cell Lines			
In vivo Biosafety of Chemo-Photothermal Combined Therapy The tissues of A549 tumor-bearing mice less than 300 mg were digested in H2O2 and HNO3 (11) using MARS5 Microwave digestion system.	A549		Suggestion: RRID:CVCL_0023(link)
Experimental Models: Organisms/Strains			
In vivo Activity Female BLABC Nude mice and male ICR mice were purchased from Beijing Vital River Laboratory Animal Technology Co .	BLABC Nude		
Female BALBC Nude mice were used to evaluate the chemo-photothermal combined therapy in vivo.	BALBC Nude		
Software and Algorithms			
Statistical Analysis All data were expressed as mean +- SD and analyzed by one-way ANOVA using Prism 7.0 software.	Prism		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical Analysis All data were expressed as mean +- SD and analyzed by one-way ANOVA using Prism 7.0 software.	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
