SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by each respective institutions institutional review board (IRB).
Field Sample Permit: All methods were carried out in accordance with relevant guidelines and regulations.
Consent: The IRBs granted a waiver of consent as this was a retrospective study.
Inclusion and Exclusion Criteria
Patients were excluded if source control was unable to be achieved within 72 hours and if polymicrobial infections were present that required >1 antibiotic for definitive therapy.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Weight: Patients were classified into 2 groups based on body mass index (BMI): nonobese (BMI <=29.9 kgm2) and obese (BMI >=30.0 kgm2) 9.
Randomization
not detected.
Blinding
not detected.
Power Analysis
A post hoc power analysis was conducted to determine if the effect size impacted the ability to detect a difference in the primary endpoint.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were performed using SPSS (version 26.0, IBM, Armonk, New York).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Categorical data were analyzed utilizing Pearson kh 2 or Fisher exact test continuous data were analyzed utilizing the Mann-Whitney U test.	Fisher exact test
	Mann-Whitney U test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
