SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Stage 3: study selection Two reviewers (LKW and SJ) independently screened all articles against the inclusion criteria: (1) English language , (2) published research or industry reports , (3) focused on Australian health workforce safety , (4) focused on the remote health sector and (5) identifies hazardssafety risks andor recommendations to reduce risk .
Attrition
Literature review and mixed methods:Audits , policy review , site visits , interviews and focus groups Literature review and interviews conducted externally (n=unknown)Focus group participants (n=103 face-to-face participants , unknown additional over videoconference) CRANAplus3 (2017)Australia wide Remote health workforce safety and security report: literature review , consultation and survey results Industry report .
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Where possible, the equivalent MeSH terms were used, such as when searching Ovid Emcare (see online supplemental material).	MeSH		Suggestion: MeSH (RRID:SCR_004750)(link)
10.1136bmjopen-2021-051345.supp1 Supplementary data Four database searches were performed in October 2020, with Informit Health Collection, Ovid Emcare, Web of Science (Core Collection and Medline) and ProQuest (Australia & New Zealand Database, Health & Medical Collection, Healthcare Administration Database, Nursing and Allied Health Database, Public Health Database,	Medline		Suggestion: MEDLINE (RRID:SCR_002185)(link)
	ProQuest		Suggestion: ProQuest (RRID:SCR_006093)(link)
Literature review and qualitative:Stakeholder consultation and workshop Literature review conducted externally (n=unknown)Public consultation submissions (n=28)Workshop (n=14 participants , plus 11 project team members) Weymouth et al 18 (2007)NT , SA and WA What are the effects of distance management on the retention of remote area nurses in Australia ?	qualitative:Stakeholder		
These were then condensed into subthemes and themes, with NVivo used to check the themes against the original articles to ensure content validity.	NVivo		Suggestion: NVivo (RRID:SCR_014802)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
