Document Identifier: **PMC8408343**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the Independent Ethics Committee of the Peking University Third Hospital (IRB00006761-M2020430) which was the primary research institution of this study and the Ethics Committee of Tibet Autonomous Region Peoples Hospital (ME-TBHP-20-KJ-036)
Consent: Written informed consents were obtained from the patients or their close relatives.
Inclusion and Exclusion Criteria
Exclusion criteria included: 1) age <40 years 2) subjects with airway diseases other than COPD 3) acute exacerbation of COPD in the past 3 months 4) active tuberculosis 5) cardiovascular or cerebrovascular events in the past 3 months 6) cognitive dysfunction such as vascular dementia or Alzheimers disease 7) refusal to participate in this study .
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Exclusion criteria included: 1) age <40 years 2) subjects with airway diseases other than COPD 3) acute exacerbation of COPD in the past 3 months 4) active tuberculosis 5) cardiovascular or cerebrovascular events in the past 3 months 6) cognitive dysfunction such as vascular dementia or Alzheimers disease 7) refusal to participate in this study .
Randomization
not detected.
Blinding
22 Imaging analysis was performed by two radiological specialists who were unaware of the clinical data of the patients.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were performed using SPSS software, version 19.0 (IBM, Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Unpaired t-test was used to evaluate the differences between continuous variables.	t-test
Chi-square test or Fisher exact test was used for categorical variables.	Chi-square test
	Fisher exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
