SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Written consent is not required according to Swedish law.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
Statistical analysis Comparisons were made between men and women, and between those with type 1 and type 2 MI.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
MACE was defined as a composite end point of all-cause mortality, readmissions for non-fatal MI (I21), heart failure (I50) and ischaemic stroke (I63).	MACE		Suggestion: MACE (RRID:SCR_005520)(link)
Statistical analysis was done by SPSS V.26.0 (IBM).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
