SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
The eligibility criteria included (a) 18 years old or older, (b) willing to quit smoking but previously failed, (c) score of nicotine dependence >=1, and (d) owning a smartphone and can proficiently use the WeChat app.
Attrition
not required.
Sex as a biological variable
Lactating and pregnant women were excluded.
Subject Demographics
Age: The eligibility criteria included (a) 18 years old or older, (b) willing to quit smoking but previously failed, (c) score of nicotine dependence >=1, and (d) owning a smartphone and can proficiently use the WeChat app.
Randomization
(c) WeChat groups were set up, with five randomized participants in each group, which was supervised by one specialist.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Secondary Outcomes The following are the secondary outcomes: (1) Effective methods for smoking abstinence (2) Education experience and occupation for those successes (3) Specific propaganda materials are most useful in SC. (4) Main withdrawal symptoms during the SC period (5) Main reasons for failure (6) Differences in the average number of cigarettes smoked per day before and after this intervention for those reported failures (7) Places that stimulate the impulse of smoking relapse Data Analysis All data were analyzed using the SPSS Software Version 16.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The difference before and after the intervention for all the failures was investigated, and a t test was performed to compare the mean numbers.	t test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
