SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by the Medical Ethics Committee of our hospital, and all participants signed informed consent forms and voluntarily participated in the study.
Consent: This study was approved by the Medical Ethics Committee of our hospital, and all participants signed informed consent forms and voluntarily participated in the study.
Inclusion and Exclusion Criteria
not detected.
Attrition
In terms of histopathological type, the 122 patients included 79 patients with ovarian serous cystadenocarcinoma, 28 patients with ovarian mucinous cystadenocarcinoma, and 15 patients with ovarian endometrioid carcinoma; in terms of clinical staging according to the criteria released by the International Federation of Gynecology and Obstetrics (FIGO), there were 10 patients at stage I, 36 patients at stage II, 64 patients at stage III, and 12 patients at stage IV; in terms of differentiation according to grading criteria released by the WHO, there were 15 patients with high differentiation, 33 patients with moderate differentiation, and 74 patients without differentiation.
Sex as a biological variable
not detected.
Subject Demographics
Age: They were between 25 and 81 years old, with a median age of 56.82 years, treated for the first time, without any radiotherapy, chemotherapy and endocrinotherapy before.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis A database was established using Excel 2007.	Excel		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
SPSS17.0 (Chicago, IL, USA), t test, and χ2 test were adopted.	t test
	χ2 test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
