SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
From a homogeneous suspension, L. tarentolae (100 mL) were loaded, in quadruplicate, into Falcon(r) 96 well plates following incubation with the MTT reagent (5 mgmL water), A 595 nm values were determined using the Bio-Rad iMark Microplate Reader plate reader.

Number: From a homogeneous suspension, L. tarentolae (100 mL) were loaded, in quadruplicate, into Falcon(r) 96 well plates following incubation with the MTT reagent (5 mgmL water), A 595 nm values were determined using the Bio-Rad iMark Microplate Reader plate reader.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Brain heart infusion media (BHI from Sigma Aldrich) supplemented with streptomycin, penicillin, and hemin (all from Sigma Aldrich) was used for L. tarentolae culturing following the method of Morgenthaler et al. 18.	Sigma Aldrich		Suggestion: Sigma-Aldrich (RRID:SCR_008988)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
When applicable, all statistics performed consisted of a one-way ANOVA followed by Tukey Post Test to evaluate statistical difference relative to control cells a $p < 0.05$ is considered significantly different.	ANOVA
	Tukey Post Test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
