SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: For the study, ethics committee approval was received from Istanbul Sabahattin Zaim University Ethics Committee with the number of 202004 on 30.04.2020.
Consent: In the first section of the online form, purpose of the study was stated and no name information was requested, also it was emphasized that the participation in the study was on a voluntary basis, and they could withdraw from the study whenever they want and participant consent was obtained.
Inclusion and Exclusion Criteria
not detected.
Attrition
During the development of the questionnaire, 565 participants between the ages of 18-60 (34.34 +-11.84) were included in the study.
Sex as a biological variable
METHODS Participants The sample of this study, which was held between the dates 04.07.2020-11.07.2020, consists of a total 528 participants between the ages of 18-69 (30,81+-10,45) as 314 women (59,5) and 214 men (40,5) that were reached online by snowball method in accordance with convenience method.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
528 participants were randomly divided in two groups in SPSS and Explanatory Factor Analysis (EFA) and Confirmatory Factor Analysis (CFA) were applied separately to the datasets of 264 participants.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were made with SPSS v25.0 and AMOS program.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	AMOS		Suggestion: AMOS (RRID:SCR_013067)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
In Explanatory Factor Analysis, varimax rotation was applied and the conformity of questionnaire for factor analysis was tested with Kaiser-Meyer-Olkin coefficient and Bartlett test.	Bartlett test
The comparative analyses according to gender were performed with independent samples t-test.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
