SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: 2.12 Surgical procedure All the animal experimental procedures were approved by the Animal Research Committee of Peking University (Permit number: LA2021190) and we confirmed that all methods were performed in accordance with the relevant guidelines and regulations .
IACUC: 2.12 Surgical procedure All the animal experimental procedures were approved by the Animal Research Committee of Peking University (Permit number: LA2021190) and we confirmed that all methods were performed in accordance with the relevant guidelines and regulations .
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

Finally , the absorbance of sample solution was detected at 450 nm , with 6 replicate holes in each group , and the experiment was repeated 4 times .

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
Goat anti rabbit IgG (1:1000 dilution , ab150077 , abcam) was used as the secondary antibody .	anti rabbit IgG		
Software and Algorithms			
All data were analyzed using SPSS software (v.19.0).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
2.6 Compression test For the compression tests, the tetra-PEG hydrogel was prepared in a cylindroid mold with the diameter of 15 mm and height of 7.5 mm.	Compression test
Differences between two groups or multiple groups were statistically compared with unpaired Student t-test and analysis of variance (ANOVA), respectively.	t-test
	analysis of variance
	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
