SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The experiments were conducted on the participants in the Industrial Safety Laboratory of the School of Health. Ethical Features This study was approved by the Research Ethics Committee of Shiraz University of Medical Sciences (approval code IR.SUMS.REC.1398.1166).
Consent: Then, all participants signed the informed consent form before joining the study, according to the ethical guidelines.
Inclusion and Exclusion Criteria
Exclusion Criteria The participants with cardiovascular or respiratory diseases smell disorders (such as anosmia, etc.) facial hair, or deformity were excluded from the study.
Attrition
not detected.
Sex as a biological variable
Participants A total of forty-one student candidates consisting of 22 females and 19 males with a mean age of 23.66 +- 3.48 years took part in the study.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
The simple randomization technique was utilized to randomly allocate all seven studied EHR respirators equipped with OV cartridges to each participant .
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The data analyses were conducted using SPSS version 22.0.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Also, since the results obtained from the IAA fit tests were dichotomous (passfail), the Chi-squared test of independence (kh2) was proposed to check the statistical effects of the respirator brands on the IAA fit tests.	Chi-squared test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
