Document Identifier: **PMC8427077**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
2 Sex Female 9 Male 11 Patients with colorectal carcinoma 20 Age Range 35-69 TNM tumor stages T1 4 T2 6 T3 2 T4 8 TNM lymph node status N0 12 N1 2 N2 6 Metastases M0 16 M1 4 Abbreviations: T, tumor N, lymph node M, metastases.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Data Information
Availability: In our study, GSE41655 and GSE57965 datasets were downloaded from GEO.

Identifiers: In our study, GSE41655 and GSE57965 datasets were downloaded from GEO.	GSE41655
	GSE57965

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
The Human Protein Atlas is a Swedish-based program initiated in 2003 to map all the human proteins in cells, tissues, and organs using an integration of various omics technologies, including antibody-based imaging, mass spectrometry-based proteomics, transcriptomics, and systems biology.	antibody-based imaging, mass spectrometry-based proteomics, transcriptomics,		
Software and Algorithms			
11 Functional and Pathway Enrichment Analysis GO functional analysis and KEGG pathway analysis were performed to predict the potential functions of the DEMs by using the Database for Annotation , Visualization , and Integrated Discovery (FunRich http:www.funrich.org)	http:www.funrich.org		
Cytoscape software was utilized to perform KEGG (Kyoto Encyclopedia of Genes and Genomes) enrichment analysis .	Cytoscape		Suggestion: Cytoscape (RRID:SCR_003032)(link)
	KEGG		
ClueGO is a Cytoscape plug-in , which visualizes non-redundant biological terms for a large number of gene clusters in functional packet networks .	ClueGO		Suggestion: ClueGO (RRID:SCR_005748)(link)
The identified genes were input into the CMap database to Search for drugs against the transformation of adenoma to adenocarcinoma, and the enrichment scores were also calculated.	CMap		Suggestion: CMap (RRID:SCR_016204)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
To reduce the number of microRNAs with similar expression , stepwise Cox regression was performed for microRNAs with P < 0.005 to establish a prognostic model .	Cox regression
Oligonucleotides	
The following primers were used for qRT-PCR reactions: hsa-miR-455: 5-GCAGUCCAUGGGCAUAUACAC-3 and hsa-miR-125a: 5-CCGTCCCTGAGACCCTTTAAC- 3 .	5-GCAGUCCAUGGGCAUAUACAC-3
	5-CCGTCCCTGAGACCCTTTAAC- 3

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
