Document Identifier: **PMC8428724**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
2 Material and methods 2.1 Search strategy Electronic databases, such as PubMed-MEDLINE, Web of Science, and Cochrane Library, were screened for eligible studies by 2 researchers independently.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
2.3 Data extraction and quality control Two investigators were blinded to each other while reviewing the trials and independently screened the reports.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2 Material and methods 2.1 Search strategy Electronic databases, such as PubMed-MEDLINE, Web of Science, and Cochrane Library, were screened for eligible studies by 2 researchers independently.	Cochrane Library		Suggestion: Cochrane Library (RRID:SCR_013000)(link)
2.5 Statistical analysis All the statistical analyses in this study were performed using RevMan5.3 (Cochrane community, https:community.cochrane.orghelptools-and softwarerevman-5revman-5-download).	Cochrane community		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
22 The survival curves were plotted using Kaplan-Meier analysis and the log-rank test.	log-rank test
The heterogeneity between studies was examined by the Higgins I-squared (I 2) statistic and Cochran Q test.	Cochran Q test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
