SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was carried out in accordance with the Declaration of Helsinki and approved by the local Ethical Committee (protocol number 2900).
Inclusion and Exclusion Criteria
21 Expression values of MX1 were excluded from interferon score calculation because the corresponding protein is normally expressed on pDCs.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
The sample size was calculated relative to the analysis of gene expression and assuming a normal distribution of gene expression data, after logarithmic transformation, and hypothesizing a 1-way analysis of variance model balanced with 4 groups.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Proprietary algorithms were used in selected areas count by touch using the ImageScope tool was realized on digital snapshots at x40 of magnification (snapshot corresponds to 0.157 mm2) .	ImageScope		Suggestion: ImageScope (RRID:SCR_014311)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
22,23 Statistical Analysis Statistical analyses used in the study were Fisher test for protein evaluation and 1-way analysis of variance for gene expression, after logarithmic transformation.	Fisher test
	analysis of variance
Comparison of statistics between the samples was performed using the Mann-Whitney test for 2-sided nonparametric values.	Mann-Whitney test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
