SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: METERIALS AND METHODS This study was approved by the Institutional Review Board of Hanyang University Guri Hospital (IRB No. 2020-08-032) and conformed to the tenets of the Declaration of Helsinki, which waived the need for informed consent because of the retrospective nature of the study.
Consent: METERIALS AND METHODS This study was approved by the Institutional Review Board of Hanyang University Guri Hospital (IRB No. 2020-08-032) and conformed to the tenets of the Declaration of Helsinki, which waived the need for informed consent because of the retrospective nature of the study.
Inclusion and Exclusion Criteria
As we described in the INTRODUCTION, patients with acute cerebral infarction caused by other causes except cardiac embolism, were excluded to reduce the possible effects of heterogeneity on HT after acute cerebral infarction.
Attrition
Overall, 578 patients were initially selected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
All frontal skull HUs were measured by two faculty neurosurgeons who were blinded to the clinical data of all patients.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed using R software, version 3.6.3 (R Foundation for Statistical Computing, Vienna, Austria) and IBM SPSS for Windows, version 24.0 (IBM Corp., Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical methods The chi-square and Students t-tests were conducted to assess clinical differences between the two groups, divided by HT or not.	chi-square
	t-tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
