SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was conducted with the approval of the Institutional Review Boards of all participating hospitals.
Consent: Informed consent or a substitute for it was obtained from all patients for inclusion in the study.
Inclusion and Exclusion Criteria
The following exclusion criteria were applied: 1) missing survival data 2) Mx and preoperative or postoperative M1 diagnosis or 3) patients without surgery After these evaluations, 860 G-NEC patients were considered.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were performed using IBM SPSS (Version 20.0 IBM Corp.,	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis A Students t test or Mann-Whitney U test was used for continuous variables.	t test
	Mann-Whitney U test
We used a kh2 test or Fishers exact test to compare the categorical variables of the clinical characteristics.	kh2 test
	Fishers exact test
The survival rates were then compared using a log-rank test.	log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
