Document Identifier: **PMC8448064**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: 2 Patients and methods 2.1 Patients This study was approved by the ethics committee of Shaanxi Province Public Hospital.
Consent: Each patient signed an informed consent form.
Inclusion and Exclusion Criteria
Inclusion criteria8,9: all patients were confirmed to be malignant tumors by pathology and all patients had no symptoms such as cold, fever, dizziness, and nausea within 2 weeks before the examination.
Attrition
not detected.
Sex as a biological variable
Inclusion criteria8,9: all patients were confirmed to be malignant tumors by pathology and all patients had no symptoms such as cold, fever, dizziness, and nausea within 2 weeks before the examination.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
2.2 Diagnostic method The patients were randomly divided into observation group and control group with 50 patients in each group.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2.4 Statistical analysis Statistical analysis was made by software SPSS 20.0 (International Business Machines, corp., Armonk, NY).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Count data were expressed as percentage (), and kh2 test was used to assess the differences between the 2 groups.	kh2 test
Measurement data were expressed as means +- standard deviation, and t test was used to assess the differences between the 2 groups.	t test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
