# SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

**Table 1: Rigor Adherence Table**

| |
|---|
| Ethics |
| IRB: This study was approved by the Gipuzkoa Clinical Research Ethics Committee. |
| Consent: All participants were right-handed and provided written informed consent before joining the experiment . |
| Inclusion and Exclusion Criteria |
| Nine additional participants were excluded: three participants (one PD-ICD and two HC) due to outlier performance (>2 SDs) on the conditional SST task three (two PD-ICD and one HC) for excessive head motion during fMRI scanning (see MRI data analysis for more details) and three (one PD-noICD and two HC) for problems related to constructing a functional mask due to motion during structural data acquisition. |
| Attrition |
| Nine additional participants were excluded: three participants (one PD-ICD and two HC) due to outlier performance (>2 SDs) on the conditional SST task three (two PD-ICD and one HC) for excessive head motion during fMRI scanning (see MRI data analysis for more details) and three (one PD-noICD and two HC) for problems related to constructing a functional mask due to motion during structural data acquisition. |
| Sex as a biological variable |
| not detected. |
| Subject Demographics |
| Age: not detected. |
| Weight: not detected. |
| Randomization |
| not detected. |
| Blinding |
| not detected. |
| Power Analysis |
| not detected. |

| Replication |
| --- |
| not required. |

**Table 2: Key Resources Table**

| Your Sentences | REAGENT or RESOURCE | SOURCE | IDENTIFIER |
|---|---|---|---|
| Software and Algorithms | | | |
| Depiction of FC analyses was done with BrainNet Viewer (Xia et al., 2013). | BrainNet Viewer | | Suggestion: BrainNet Viewer, RRID:SCR_009446( link) |

**Other Entities Detected**

| Your Sentences | Recognized Entity |
|---|---|
| Statistical Tests | |
| 2.4 Behavioral data analyses Behavioral results were analysed with a 3 (Group: PD-ICD, PD-noICD, HC) by 2 (Direction: critical, non-critical) by 2 (Condition: Go, Stop) mixed-model analysis of variance (ANOVA), run on the percent of correct responses in each condition on the SST task. | analysis of variance |
| | ANOVA |
| Given our specific interest in focusing on proactive and restrained inhibition, we ran separate one-way ANOVAs with the factor Group and the absolute values of the subtraction between trials for Proactive Inhibition (critical Stop - non-critical Go), and Restrained Inhibition (non-critical Stop - non-critical Go), with accuracy as the dependent measure. | ANOVAs |

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
