SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Students enrolled in extension programs and aged below 18 and above 30 were excluded from the study.
Attrition
not required.
Sex as a biological variable
Methods Study Design, Area, Source, and Study Participants Institutional-based cross-sectional pre- and post-test comparative studies were conducted to understand the factors associated with HPV and cervical cancer awareness levels among male and female students from Tewodros and Maraki campuses of UoG.
Subject Demographics
Age: Inclusion and Exclusion Criteria All students enrolled in the regular programs aged 18 to 30 were included in the study.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Sample Size and Questionnaire Sample Size Determination The sample size was determined using the online tool of UCSF,33, to calculate the sample size required for before and after study, a two-tailed, 5 precision, 80 power, and effect size=0.5 and SDD=4.5, the sample size for the study was 638. G*Power ver3.1.9.7, for the McNemer test,34 a two-tailed, 1.5 effect size, a 0.05, 80 power, and 33 (based on pilot study) of the population changes due to the intervention, 604 participants needed to detect the effect and a finite population formula35 to determine the number of males and females required.	G*Power		Suggestion: G*Power, RRID:SCR_013726(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
