Document Identifier: **PMC8449547**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: All methods were carried out following the relevant guidelines and regulations.
Consent: Before data collection, all participants had provided written informed consent.
IRB: The Institutional Review Board of Chung Shan Medical University approved this study (CS2-16114).
Inclusion and Exclusion Criteria
However, we excluded underweight individuals (n=633) and those with incomplete or missing values (n =12,126).
Attrition
not detected.
Sex as a biological variable
Among them, 655 women and 779 men were identified with MetS.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

Number: Baseline data included sex, age, education level, marital status, body mass index (BMI), and lifestyle factors like exercise, smoking (neverformer and current smoker), alcohol consumption (150 cc per week or regularly for 6 months), midnight snacking (extra snack within an hour before going to bed), coffee drinking (at least three times a week) and tea drinking (at least one time per day).	
Data Information	
Identifiers: Genetic Variant SelectionGenotyping We selected rs3779788 in the LPL gene after reviewing the literature.	rs3779788

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis Data processing and statistical analyses were conducted using the PLINK 1.09 beta and SAS 9.4 software (SAS Institute, Cary, NC, USA).	PLINK		Suggestion: PLINK (RRID:SCR_001757)(link)
	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Data with normal distributions were analyzed by the Chi-square test.	Chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
