SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: They were checked for eligibility by the nurses, who obtained informed consent and registered the patients for this study between January and December 2017.
Inclusion and Exclusion Criteria
The inclusion criteria were as follows: (1) diabetic nephropathy stages 1-3 (estimated glomerular filtration rate eGFR) >30 mLmin1.73 m2),20 (2) undergoing treatment for DM on an outpatient basis and (3) insured by National Health Insurance living in Hiroshima City Union National Health Insurance, the insurer of Japan Health Insurance Association, Hiroshima chapter and the National Federation of Health Insurance Societies of Hiroshima living in Hiroshima Prefecture.
Attrition
not detected.
Sex as a biological variable
Patients were excluded if any of the following criteria presents: (1) presence of type 1 or secondary DM (2) currently hospitalised (3) undergoing renal replacement therapy or planning to begin renal replacement therapy within the next 6 months (4) pregnant at the time of the study (5) in terminal stages (6) cognitively impaired (score <2030 on the revised version of Hasegawas Dementia Scale21 (7) judged by the nursesprimary physicians to be unable to implement any kind of activity required in this study or (8) already registered in other clinical trials.
Subject Demographics
Age: Participants Participants were aged >20 and <74 years old and were diagnosed with type 2 DM, including diabetic nephropathy.
Randomization
not detected.
Blinding
not detected.
Power Analysis
As this was an exploratory pilot study, sample size calculation was not performed.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data analysis SPSS software V.26.0 was used for analysis.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Normality was confirmed for each item, descriptive statistics were calculated, and Freidman tests, analysis of variance, Wilcoxon signed-rank test and t-tests were performed (where appropriate) before and after the intervention.	Freidman tests
	analysis of variance
	Wilcoxon signed-rank test
	t-tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
