SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Participants signed consent forms prior to any data collection and research procedures were approved by the University of Michigans Institutional Review Board.
IRB: Participants signed consent forms prior to any data collection and research procedures were approved by the University of Michigans Institutional Review Board.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
2 Material and methods 2.1 Participants The Health and Retirement Study (HRS) is a nationally representative sample of US men and women aged 51 years and older, with data collected biennially since 1992 (Juster & Suzman, 1995).
Subject Demographics
Age: 2 Material and methods 2.1 Participants The Health and Retirement Study (HRS) is a nationally representative sample of US men and women aged 51 years and older, with data collected biennially since 1992 (Juster & Suzman, 1995).
Randomization
HRS began enhanced face-to-face (EFTF) interviews in 2006 with a random half of the sample , with the other half completed in 2008 .
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Data Information

Availability: 2.2.3 County-level crime County-level crime data are available in the HRS CDR , and were linked to participant records using county-level geographic identifiers .

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2.3 Analytic strategy To account for the complex survey design , weighted analyses were conducted in STATA 16 using the survey (svy:set) suite of commands .	STATA		Suggestion: Stata (RRID:SCR_012763)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
