SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
We excluded publications that did not describe a method for communicating uncertainties and/or risk and publications that were not within the topic of health technology decision-making.
Attrition
These stakeholders were chosen to represent the following stakeholder groups, with the purpose to include a variety of different end users of these tools, that is, analysts, reviewers, and decision-makers: HTA policy advisors from the Dutch Health Care Institute (n = 2), independent academic advisors for HTAs (n = 4), two of whom were part of the Dutch pharmaceutical decision-making committee (Wetenschappelijke Adviesraad), an appraisal committee member (n = 1) for the England and Wales NICE, and industry stakeholders (n = 4, one working in a pharmaceutical company and three for HTA consultancies).
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
