Document Identifier: **PMC8476724**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Materials and Methods Ethical considerations All procedures on the animals including blood sample collection, vaccination and skin testing were carried out according to Ethics Committee of Islamic Republic of Irans Ministry of Health and Medical Education (2013 directives).
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
The experiments were done in duplicate.
Number: The experiments were done in duplicate.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
Blood samples were collected from each dog and examined for anti-Leishmania antibodies using direct agglutination test (DAT).	anti-Leishmania		
	DAT		
Software and Algorithms			
At 4 different time points (before vaccination (i.e. day 0) and at days 30, 80 and 300 post-vaccination), blood samples were collected from the dogs and PBMCs were isolated by density-gradient centrifugation, using Histopaque 1077 (Sigma, Germany).	Sigma		Suggestion: sigma-tau (RRID:SCR_000488)(link)
Statistics All the data analyses were performed using GraphPad Prism ver. 6.01 for Windows (GraphPad Software Inc., La Jolla, CA, USA).	GraphPad Prism		
	GraphPad		Suggestion: GraphPad Prism, RRID:SCR_002798(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
One-way ANOVA followed by Tukeys multiple comparisons test was used to compare the differences between the groups.	ANOVA
	Tukeys multiple comparisons test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
