SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Patients with fusiform or dissecting IAs, other cerebrovascular diseases, IAs previously treated at other neurological centres, and incomplete clinical and imaging data were excluded.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
The 1671 IAs were randomly divided into two subsets with similar event rates, namely, the derivation subset (1171/1671, 70%) and the validation subset (500/1671, 30%).
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Data Information

Identifiers: 10.1136/svn-2020-000480.supp1 Supplementary data Clinical presentation Data were collected regarding the following: age, sex, presence of hypertension (yes/no; diagnosed by the general practitioner before admission and requiring medical treatment), smoking, both current and previous (previously smoked regularly and quit at least 1 year before admission), alcohol consumption (yes/no; current or previous intake >5 drinks per day),12 presence of cardiovascular disease (yes/no; angina pectoris, myocardial infarction or peripheral vascular disease), and previous stroke (yes/no; transient ischaemic attack or stroke).	10.1136/svn-2020-000480.supp1

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All calculations were performed using SPSS V.25.0 and R software packages.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Calibration was assessed using the Hosmer-Lemeshow test and calibration curves.	Hosmer-Lemeshow test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
