Document Identifier: **PMC8485609**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
A total of 336 patients with de novo PD within 3 year of diagnosis and without the use of dopaminergic medications at enrollment were randomized to either isradipine (n = 170) or placebo (n = 166). 12 Although most patients enrolled on no medication, they were allowed to receive amantadine (n = 26) or anticholinergic agents (n = 5) if on stable doses at the time of study entry.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
The STEADY-PD III was a 36-month, multicenter, randomized, parallel-group, placebo-controlled phase 3 study of the efficacy of isradipine in early-stage PD.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Protocol Information	
Identifiers: Patients and Methods Study Population Longitudinal data on the 33 items of the MDS-UPDRS Part 3 Motor Examination performed in the STEADY-PD III study (ClinicalTrials.gov: NCT02168842) were used to illustrate the proposed techniques.	NCT02168842

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
