Document Identifier: **PMC8486205**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Each institution obtained approval from the local ethical committee board , and each patient provided written informed consent .
Consent: Each institution obtained approval from the local ethical committee board , and each patient provided written informed consent .
Inclusion and Exclusion Criteria
Patients were eligible for inclusion in this trial if they had received irradiation for brain tumors or tumors located in sites contiguous to the brain .
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
To avoid interobserver differences in the histopathological criteria, one (HN) neuro-pathological specialist, who was blinded to all of the clinical and radiological information except the primary diagnosis, diagnosed all cases.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Biograph 128	Biograph		Suggestion: Siemens Biograph mMR 3.0 Tesla scanner (RRID:SCR_025900)(link)
Statistical analyses were performed using SAS, version 9.4 (SAS Institute).	SAS		
	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)
Post hoc analysis was performed using GraphPad Prism 8.42 (GraphPad Software).	GraphPad		Suggestion: GraphPad Prism, RRID:SCR_002798(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The sensitivities and diagnostic accuracy of 11C-MET PET and 18F-FDG PET determinations were compared by the McNemar test.	McNemar test
The Mann-Whitney U test was utilized to compare the median TN ratio in each group of patients.	Mann-Whitney U test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
