Document Identifier: **PMC8487288**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
EV Isolation and Quantification Follicular Fluid (FF) of preovulatory follicles was collected from women undergoing intracytoplasmic sperm injection (ICSI) cycles , recruited at the IVF Unit Cannizzaro Hospital , Catania (Italy) , according to a previously published protocol.51 EVs from FF samples were isolated by differential ultracentrifugation according to the protocol by Santonocito et al with minor modifications and resuspended in 1 mL PBS.51,200 mL of EV suspension was loaded onto Si NWs for EV quantification .
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
The excitation was obtained through the 476.5 nm line of an Ar+ laser and focused through a 100X (NA=0.9) objective with a power of 100 uW onto the sample plane.
Replication
Each dilution was analyzed with three technical replicate reactions .

Type: Each dilution was analyzed with three technical replicate reactions .
Number: Each dilution was analyzed with three technical replicate reactions .

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
Streptavidin and Phosphate Buffer Saline (PBS, 0.01 M phosphate buffer, 0.0027 M potassium chloride and 0.137 M sodium chloride, pH 7.4, at 25 degC) tablets were obtained from Sigma Aldrich, while the biotinylated anti-CD81 monoclonal antibody (specific for CD81 binding) was purchased from LifeSpan BioSciences.	anti-CD81		
	CD81 binding		
Software and Algorithms			
Exosomes were acquired from Hansa BioMed Life Sciences Ltd.	Hansa BioMed		
For statistical analysis , Pearsons Correlation coefficient (r) and P-value were calculated using GraphPad Prism 6 .	GraphPad Prism		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
