SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Materials and Methods We conducted a cross-sectional observational study after obtaining formal approval of the institutional human ethics committee of All India Institute of Medical Sciences (AIIMS), Bhopal, India (LOP/2015/STS0045–2015).
Consent: Patients with LBP of < 6-week duration, chronic LBP combined with other diagnosed musculoskeletal diseases, patients with history of back surgery, individuals who were incapable of understanding and answering the questionnaires, and those who did not consent were excluded.
Inclusion and Exclusion Criteria
Fifty patients satisfying the inclusion and exclusion criteria were enrolled.
Attrition
Fifty patients satisfying the inclusion and exclusion criteria were enrolled.
Sex as a biological variable
not detected.
Subject Demographics
Age: Inclusion criteria were 1) age > 18 years and 2) LBP which had failed to improve over past 6 weeks.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All the data was collected in a Microsoft Excel sheet.	Microsoft Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)
It was then coded, entered, and analyzed using Statistical Package for Social Science (SPSS version 26, Armonk NY).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Association study between the variables was performed, statistical significance was calculated using Fisher's exact test, and p value of < 0.05 was taken as statistically significant.	Fisher's exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
