Materials Design Analysis Reporting (MDAR) Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.oio/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: page no/section/legend)	n/a
For commercial reagents, provide supplier name, catalogue number and RRID, if available	No antibodes detected. Please add identifiers for all resources where possible	

Cell Materials	Yes (indicate where provided: page no/section/legend)	n/a
Cell lines: Provide species information, strain. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID	No cell lines detected Please add identifiers for all resources where possible	
Primary cultures: Provide species, strain, sex of origin, genetic modification status.	Not currently checked by SciScore	

Experimental Animals	Yes (indicate where provided: page no/section/legend)	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID	No organisms detected Please add identifiers for all resources where possible	
Animal observed in or captured from the field: Provide species, sex and age where possible	Not currently checked by SciScore	
Model organisms: Provide Accession number in repository (where relevant) OR RRID	See laboratory animals section for information.	

Plants and microbes	Yes (indicate where provided: page no/section/legend)	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)	Not currently checked by SciScore	
Microbes: provide species and strain, unique accession number if available, and source	Not currently checked by SciScore	

Human research participants	Yes (indicate where provided: page no/section/legend)	n/a
Identify authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Materials and Methods Study Design, Setting, and Trial Registration This prospective, open-label, experimental study was approved by the Certified Review Board of the Medical Corporation Shinanokai	
Provide statement confirming informed consent obtained from study participants.	All participants were fully informed of the purpose and procedures of this study , and all provided written consent to the investigators .	
Report on age and sex for all study participants.	**Age:**Participants All subjects enrolled in this study were patients with primary open-angle glaucoma (POAG) or ocular hypertension (OH) in at least one eye who had not been treated within 4 weeks before enrollment , who had an IOP of 18 mmHg or more for POAG , 21mmHg or more for OH in at least one eye , and 34 mmHg or less in both eyes , and who were aged 20 years and old. **Sex:**The exclusion criteria were as follows: aphakic or pseudophakic eyes , any corneal abnormalities or other disorders that may interfere with accurate tonometry with the Goldmann Applanation Tonometer (GAT) , a history of corneal refractive surgery , corrected visual acuity of 20/33 or less , the possibility of developing visual field impairment	

Human research participants	Yes (indicate where provided: page no/section/legend)	n/a
	during the study period , severe visual field impairment within 6 months including the date of consent acquisition (eg , **Sex:**–**Sex:**20 dB or less with a mean deviation in the Humphrey visual field test program central 30-2) , active external eye disease , eye/eyelid inflammation , and infections , a history of anterior or internal eye surgery , a history of glaucoma surgery including laser treatment , hypersensitivity to the components of the drug used in this study , being pregnant , a lactating woman , possibly pregnant , wishing to become pregnant during the study period , or unable to use proper contraception during the study period.	

Design

Study protocol	Yes (indicate where provided: page no/section/legend)	n/a
For clinical trials, provide the trial registration number OR cite DOI in manuscript.	Not detected.	

Laboratory protocol	Yes (indicate where provided: page no/section/legend)	n/a
Provide DOI or other citation details if detailed step-by-step protocols are available.	Not detected.	

Experimental study design (statistics details)	Yes (indicate where provided: page no/section/legend)	n/a
State whether and how the following have been done, or if they were not carried out		
Sample size determination	not detected.	
Randomization	not detected.	
Blinding	not detected.	
inclusion/exclusion criteria	The exclusion criteria were as follows: aphakic or pseudophakic eyes , any corneal abnormalities or other disorders that may interfere with accurate tonometry with the Goldmann Applanation Tonometer (GAT) , a history of corneal refractive surgery , corrected visual acuity of 20/33 or less , the possibility of developing visual field impairment during the study period , severe visual field impairment within 6 months including the date of consent acquisition (eg , –20 dB or less with a mean deviation in the Humphrey visual field test program central 30-2) , active external eye disease , eye/eyelid inflammation , and infections , a history of anterior or internal eye surgery , a history of glaucoma surgery including laser treatment , hypersensitivity to the components of the drug used in this study , being pregnant , a lactating woman , possibly pregnant , wishing to become pregnant during the study period , or unable to use proper contraception during the study period.	

Sample definition and in-laboratory replication	Yes (indicate where provided: page no/section/legend)	n/a
State number of times the experiment was replicated in laboratory	Not detected.	
Define whether data describe technical or biological replicates	Not detected.	

Ethics	Yes (indicate where provided: page no/section/legend)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Materials and Methods Study Design, Setting, and Trial Registration This prospective, open-label, experimental study was approved by the Certified Review Board of the Medical Corporation Shinanokai	
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Not detected.	

Ethics	Yes (indicate where provided: page no/section/legend)	n/a
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Not detected.	

Dual Use Research of Concern (DURC)	Yes (indicate where provided: page no/section/legend)	n/a
If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval	Not currently checked by SciScore	

Analysis

Attrition	Yes (indicate where provided: page no/section/legend)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.	not detected.	

Statistics	Yes (indicate where provided: page no/section/legend)	n/a
Describe statistical tests used and justify choice of tests.	Statistical comparisons between the OMDI treatment and baseline values were performed for each parameter using the paired t-test.	

Data availability	Yes (indicate where provided: page no/section/legend)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.	Not detected.	
If data are publicly available, provide accession number in repository or DOI or URL.	Not detected.	
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.	Not detected.	

Code availability	Yes (indicate where provided: page no/section/legend)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		
State whether the code or software is available.	Not detected.	
If code is publicly available, provide accession number in repository, or DOI or URL.	Not detected.	

Analysis

Adherence to community standards	Yes (indicate where provided: page no/section/legend)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	Not currently checked by SciScore
