SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IACUC: Animal experiments and routine maintenance was in accordance with procedures approved by ILRIs Institute Animal Care and Use Committee (IACUC experiment reference 2016.24).
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
2 Material and methods 2.1 Cattle Samples of blood for preparation of peripheral blood mononuclear cells (PBMCs) were taken from two adult male African Bos indicus breeds - 1 year old Boran and 11 year old Ankole - sourced from the ILRI farm.
Subject Demographics
Age: 2 Material and methods 2.1 Cattle Samples of blood for preparation of peripheral blood mononuclear cells (PBMCs) were taken from two adult male African Bos indicus breeds - 1 year old Boran and 11 year old Ankole - sourced from the ILRI farm.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Cell Line Authentication

not detected.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Cell Lines			
As such , transcript length cut-offs of 490 bp , 420 bp and 290 bp for PCR-1 , PCR-2 and PCR-3 respectively , were applied to eliminate assemblies of short poor quality reads but at the same time allow assemblies which may have length variation in a structural region to pass .	PCR-1		
	PCR-2		
Software and Algorithms			
Scripts within pRESTO v1.0.0	pRESTO		Suggestion: pRESTO (RRID:SCR_001782)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
