SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
2.1 Study population We included outpatients aged >=18 years treated with a VKA for any indication, who were registered by the anticoagulation clinic as testing positive for COVID-19 between February 27, 2020, which is the date of the first reported COVID-19 case in the Netherlands, and July 10, 2020.
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: 2.1 Study population We included outpatients aged >=18 years treated with a VKA for any indication, who were registered by the anticoagulation clinic as testing positive for COVID-19 between February 27, 2020, which is the date of the first reported COVID-19 case in the Netherlands, and July 10, 2020.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Therefore, we used the paired sample t test to compare the measures of TTR and VGR in the 6 weeks and between 6 and 12 weeks after the date of infection with the measures in the 26 weeks before the date of infection that was used as a reference category.	t test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
