SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Ethics
IRB: This study was approved by the institutional ethics committee of our hospital.
Consent: Written informed consent was obtained from each patient and their families.
Inclusion and Exclusion Criteria
Inclusion criteria were as follows: a) Patients with upper urinary tract calculi diagnosed by ultrasonography of the urinary system, computed tomography (CT) and CT urography (CTU), b) those with unilateral calculi, c) those who had calculi with a diameter of < 2 cm, d) those who met the indications for surgery after electrocardiography, blood biochemistry, routine blood and urine tests, urine culture, full-size chest radiography, and tests of blood coagulation, liver and kidney, and e) those with complete clinical data.
Attrition
not detected.
Sex as a biological variable
In the control group there were 49 males and 24 females aged 21–78 years, with an average age of 45.42 ±10.64 years.
Subject Demographics
Age: In the control group there were 49 males and 24 females aged 21–78 years, with an average age of 45.42 ±10.64 years.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
