SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Out of the remaining 7,063 complete records , we further excluded 406 households in which either the mother or father of the study child never held a full-time job .
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: Study children were 9 months old at the time of the first interview (Wave 1, 20082009) and we follow them at age 3 (Wave 2, 2011) and 5 (Wave 3, 2013).
Weight: These are sex of the child, dummies for birth order, a counter for the number of siblings, and a dummy for low birthweight (< 2,500 g).
Randomization
Despite bringing about widespread job loss, the Great Recession did not increase the odds of job loss at random.
Blinding
not detected.
Power Analysis
not detected.
Replication
Standard errors and confidence intervals are computed using the non-parametric bootstrap (with 200 replications).

Number: Standard errors and confidence intervals are computed using the non-parametric bootstrap (with 200 replications).

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
