SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
The inclusion criteria were as follows: age >=35 years on 1 January 2011 or reached during follow-up no past history of any of the investigated outcomes (AMI , IS , HS) full information available about exposures and covariates of interest .
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: The inclusion criteria were as follows: age >=35 years on 1 January 2011 or reached during follow-up no past history of any of the investigated outcomes (AMI , IS , HS) full information available about exposures and covariates of interest .
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
17 , 18 All statistical analyses were performed using SAS 9.4 (SAS Institute, Cary, NC, USA).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
