SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Material and Methods The study was approved by the local ethics committee (The Ethics Committee of University of Health Sciences Umraniye Education and Research Hospital, Date: 15.12.2016 Number: B.10.1.TKH.4.34.H.GP.0.01128) and performed according to the Declaration of Helsinki principles.
Consent: All subjects gave informed consent.
Inclusion and Exclusion Criteria
Patients with documented diseases involving heart failure, atherosclerotic cardiovascular disease, structural heart disease, peripheric arteries disease, liver failure, acute and chronic kidney disease, chronic lung disease, thromboembolic disease, autoimmune vasculitis, malignancy, thyroid and autoimmune system, infections, and chronic usage of anti-inflammatory andor immune suppressive medication were excluded from the study.
Attrition
not detected.
Sex as a biological variable
III.14 Waist circumference >102 cm in men or >88 cm in women serum level of triglycerides (TGs) of 150 mgdL or greater high-density lipoprotein (HDL) cholesterol level of <40 mgdL in men or <50 mgdL in women systolic blood pressure (SBP)diastolic blood pressure (DBP) of 13085 mmHg or greater or taking hypertension medications or fasting plasma glucose level of 100 mgdL or greater or taking diabetes mellitus medications .
Subject Demographics
Age: The patient group was consisted of 50 patients with MS over 65 years.
Randomization
not detected.
Blinding
not detected.
Power Analysis
The number of the study participants was based on the power analysis.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
(MedCalc Software bvba, Ostend, Belgium http:www.medcalc.org 2013).	MedCalc		Suggestion: MedCalc (RRID:SCR_015044)(link)
	http:www.medcalc.org		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Data were compared between two groups using the Students t-test for continuous variables and Chi-square tests for categorical variables.	t-test
	Chi-square tests
For correlations, Pearsons correlation test was used.	Pearsons correlation test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
