SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: The main components of U5MR are neonatal mortality rate (NMR: number of neonatal deaths from birth to 28 days per 1000 live births), infant mortality rate (IMR: the number of deaths of children under 1 years), and 59–1 months mortality rate (Number of deaths of children aged 1 to 59 months in 1000 live births).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
To analyze the data, software SPSS (Statistical Package for the Social Sciences) version 20, IBM company was used.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
In order to investigate the relationship between children's death with other variables (gender, nationality, place of residence, place of death, city location, and underlying cause of death) Chi-square test (taking into account the significance level of 5%) was used.	Chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
