SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Data collection The researcher proceeded to various elementary schools in Shahroud, after the research proposal was approved by the research council and ethical committee of the university.
Consent: After obtaining informed consent from the participants, the demographic questionnaire and Conners Parents Questionnaire were given to students parents.
Inclusion and Exclusion Criteria
In addition, the questionnaires that were not appropriately completed by parents andor teachers were excluded from further analysis.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
Study participants and sampling A total sample of 779 students of elementary school was selected through stratified cluster random sampling.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data analyses All statistical analyses were performed using SPSS Statistics for Windows, Version 20.0.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
using descriptive statistics, independent samples t-test, one-way ANOVA, and linear regression.	t-test
	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
