SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: Necessary permits were obtained from the Ethics Committee of the Vice Chancellor for Research of Shiraz University of Medical Sciences.
IRB: Necessary permits were obtained from the Ethics Committee of the Vice Chancellor for Research of Shiraz University of Medical Sciences.
Consent: Individual sector stations covered cases such as (confidentiality, news, false testimony, sharia rules, and obtaining informed consent) and then a team station of clinical decision-making.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Furthermore, the student portfolio, including the discussion and interpretation of an ethical case/ interpretation of an ethical article/ and student's perception of teaching set conducted in the field of ethical principles, was completed [Diagram 1].	Diagram		Suggestion: DIAGRAM (RRID:SCR_015675)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Validity of the OSCE test was explained through the opinion of experts from ethics teachers.	OSCE test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
