SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by our institutional review board, National Healthcare Group Domain Specific Review Board (
Inclusion and Exclusion Criteria
Only cases performed as open surgery were included and surgeries carried out using laparoscopy were excluded.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: The integrated ELAP pathway included the following components: early warning score assessed within 30 min of admission, arterial lactate measurement and antibiotics initiated within 1 h of admission for patients with suspected sepsis, general surgical review within 2 h of referral, preoperative risk assessment using Portsmouth Physiological and Operative Severity Score for the enumeration of Mortality and Morbidity (P-POSSUM), the patient receiving surgery within 6 h of admission with consultant-led perioperative care, admission of high-risk patients to critical care, and postoperative geriatric assessment of patients aged 65 years or older.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The study was approved by our institutional review board, National Healthcare Group Domain Specific Review Board (	National Healthcare		
Data analysis All analyses were undertaken using SPSS Statistics for Windows, version 25.0 (IBM Corp., Armonk, NY).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Differences were assessed using the Mann-Whitney U-test for continuous data and Fishers exact test for categorical data.	Mann-Whitney U-test
	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
