SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
In total, 1,057 patients were evaluated, in which all the information was available, and subdivided into three groups.
Sex as a biological variable
HoLEP for LUTSBPO was indicated in accordance with current European Association of Urology (EAU) guidelines on management of non-neurogenic male LUTS 1.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis Statistical analysis was performed using SPSS V26.0 software (IBM SPSS Statistics, Version 26.0.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Univariate analyses were performed using Fishers exact test, T test and Mann-Whitney U test for categorical variables and continuous variables, respectively.	Fishers exact test
	T test
	Mann-Whitney U test
For analyses, in which three groups were compared, we used univariate analysis of variation (ANOVA).	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
