Document Identifier: **PMC8554721**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Patients were excluded if they underwent procedures in addition to oesophagectomy at the time of operation.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Neoadjuvant treatment was administered increasingly as evidence supporting its usage evolved, in the form of MAGIC protocol8 chemotherapy for oesophageal adenocarcinoma in the form of epirubicin, cisplatin, and either fluorouracil or capecitabine.	MAGIC		Suggestion: Magic (RRID:SCR_006406)(link)
Statistical analysis SPSS V24 (IBM Corp, NY) was utilized for statistical analysis.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Non parametric continuous data were analyzed with the Mann-Whitney U test for dual variables, or Kruskal-Wallis test for multiple variables.	Mann-Whitney U test
	Kruskal-Wallis test
Analyses of survival outcomes were assessed with the Kaplan-Meier method, and curves representing survival outcomes were assessed with the Breslow (Wilcoxon) test.	Wilcoxon) test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
