SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical Considerations The Regional Ethics Commission in Uppsala, Sweden approved the study (DNR 2017/252).
Inclusion and Exclusion Criteria
Because the first diagnosis date cannot be established for the patients registered in the follow-up medical examinations, cases from 2005 to 2006 were thus excluded (as a wash-out period), see Figure 1.
Attrition
All patients between the age of 20 and 65 who had been diagnosed with M05 (seropositive Rheumatoid arthritis) or M06 (seronegative Rheumatoid arthritis) according to the International Classification of Diseases, 10th Edition (ICD-10), between 2005 and 2016 were included in the study.
Sex as a biological variable
not detected.
Subject Demographics
Age: A separate analysis was then run, sorting cases by their years of exposure stratified into less than 1 year of employment, 1 to 5 years of employment, and 5 to 10 years of employment and more than 10 years of employment.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
