SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not detected.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
24 14 Public health professionals -- -- -- 21 13 Clinicians -- -- -- 21 13 Community members -- -- -- 79 47 Total 167 100 Sex Male , 18+ years 47 32 41 71 43 Female , 18+ years 53 46 59 95 57 Total 100 100 100 Age (years) 20-34 26 16 21 27 16 35-54 34 31 40 78 48 55-64 19 18 23 35 21 65+ 22 12 16 24 15 Total 100 100 100
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Data Information

Availability: Two-sided tests compare a given subgroup to the sample as a whole (full analyses are available in the Supplemental Appendix).

Table 2: Key Resources Table

Non-Hispanic White		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
